

# See Red All Year Round

Colourful foliage plants provide a landscape with the real factor, Nandinas have been able to provide that burst of colour in the winter months, but now there are three Nandinas that will have you seeing red more often.

These 3 plants are changing the way we see Nandinas, providing amazing red colour in the landscape for up to 9 months of the year.

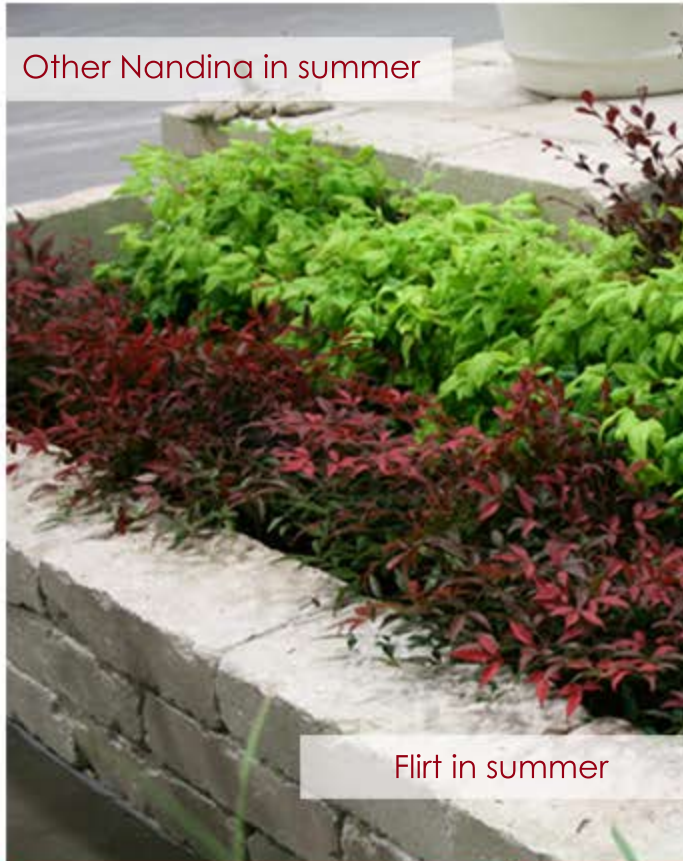

**Blush™**

*Nandina domestica* 'AKA' PBR

Compact Shrub

If you like the more traditional broader leaf Nandina, but want red more often and cleaner foliage, then **Blush™** *Nandina domestica* 'AKA' PBR is for you. In winter, **Blush™** Nandina is far more vivid red than other Nandina, and with the bonus of red new growth in the warmer months.

Other Nandina in summer

Flirt in summer

**Flirt™**

*Nandina domestica* 'MURASAKI' PBR

Ground Cover

**Flirt™** *Nandina domestica* 'MURASAKI' PBR is a low growing, spreading Nandina. What sets the **Flirt™** plant apart is that when other Nandina's are red in winter, **Flirt™** Nandina is green, but in spring, summer and autumn when other Nandina's are green, **Flirt™** Nandina is red.

**Obsession™**

*Nandina domestica* 'SEIKA' PBR

Fine Leaf Shrub

Every now and then a revolutionary plant comes along, and **Obsession™** Nandina is exactly that. Not only does it have red foliage in winter, but also have vivid, fine leaf red new growth in the warmer months. **Obsession™** Nandina has on average 9 months of contrasting red new growth, basically all its new growth is red.
